Herbert Goldstein
William W. Havens
Jeon J. Lidofsky
Thomas C. Marshall
Edward Melkonian
Gerald A. Navratil
Michael Tabor

As you prepare to graduate, we wish each of you good luck and a happy future. Go pursue your goals with all your energy, and you will have a rewarding and exciting life. Since you majored in our department, in which applied and pure science overlap, you have already begun a career that deals with new things and challenging ideas. At this juncture in history, the opportunities to use your imagination, your intellect, and your store of knowledge to make significant contributions to science and engineering and to do worthwhile things for mankind, are virtually unlimited. So go forth, excel, come back and visit — it was fun having you as students.

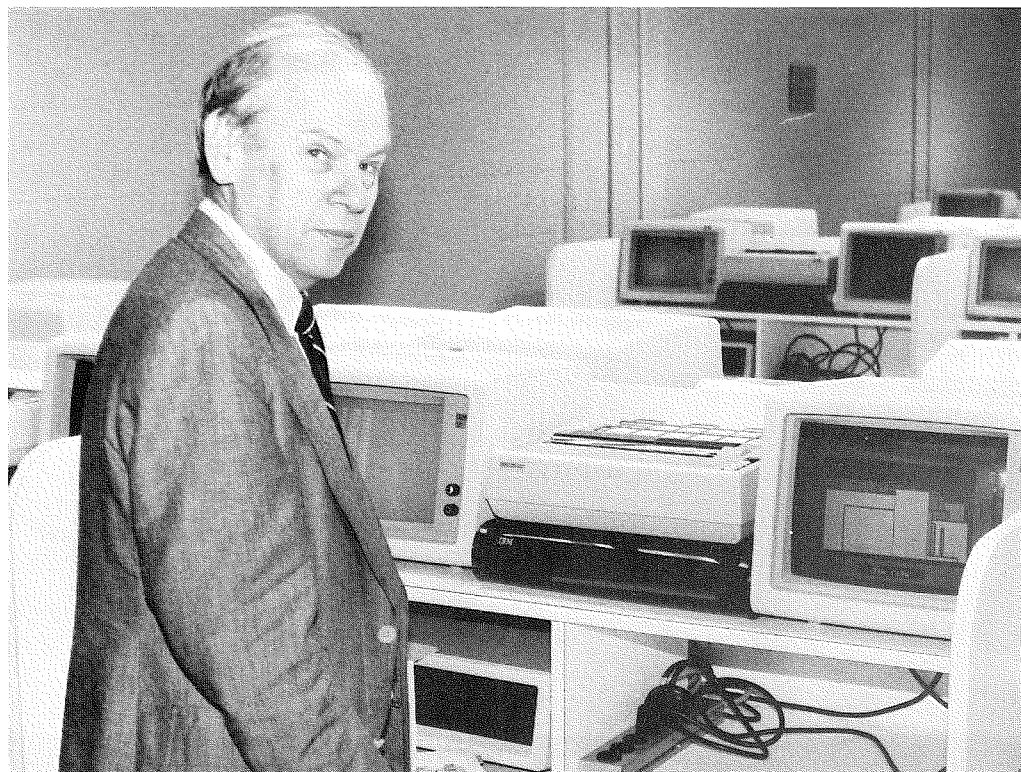

Chia Kun Chu, Chairman

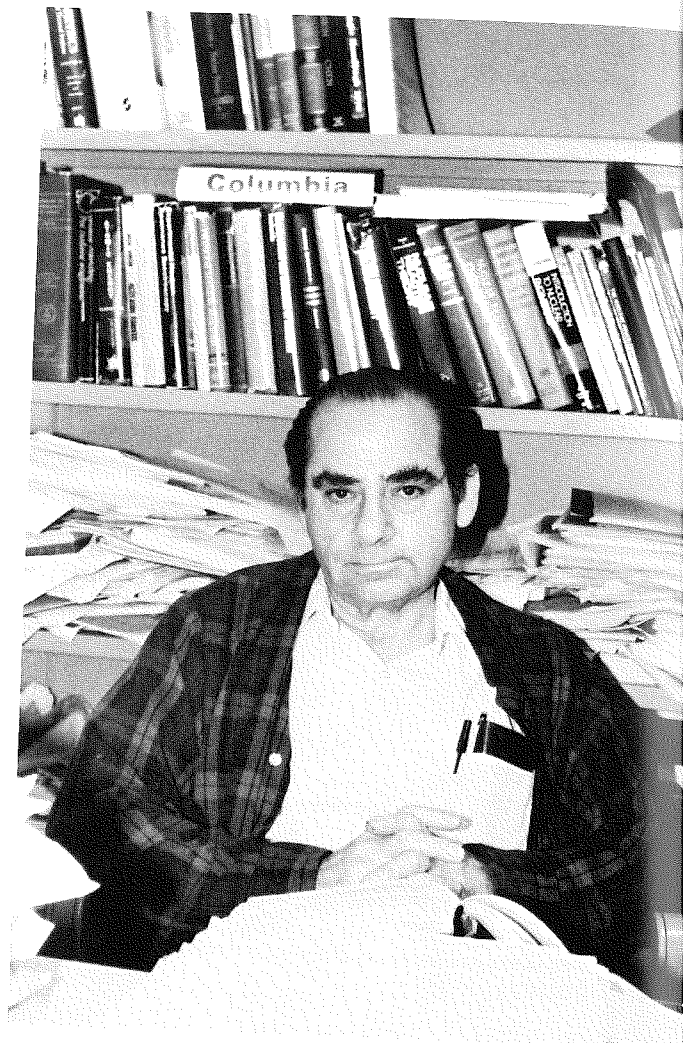

Amitava Bhattacharjee

Herbert Goldstein

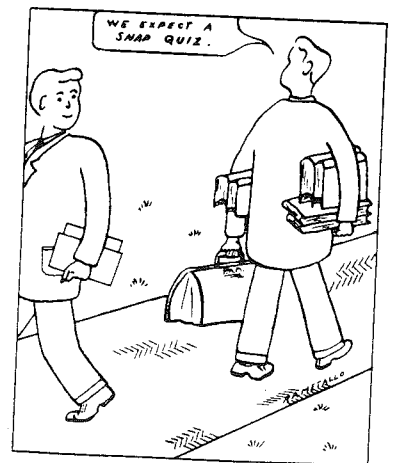

Leon Lidofsky

Edward Melkonian

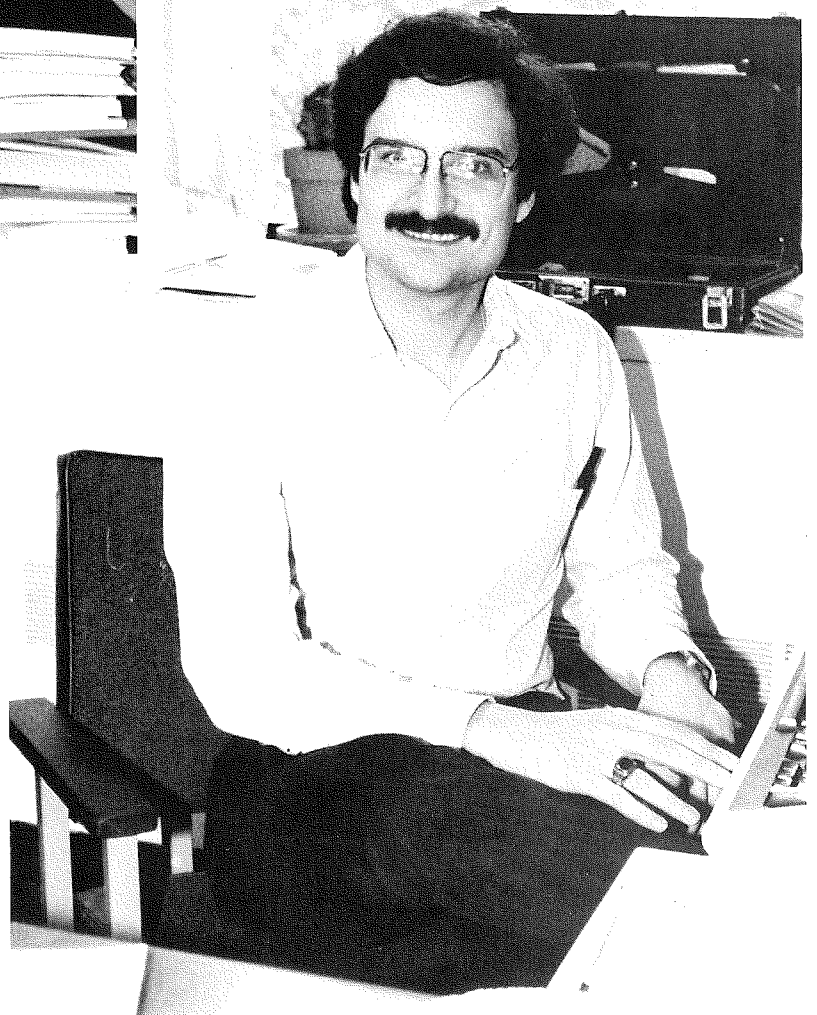

Thomas Marshall

Michael Tabor
